Installation Kits

Installation kits are available for all wood worktops.

Each kit contains everything needed to install the worktop. This includes Hardwax Oil, wood protector, polishing cloths, slotted angle brackets and connecting bolts.

The production process

Disclaimer: Wood is a natural material, so its colour and grain may differ. Worksurfaces are made from carefully chosen materials and undergo strict quality control. As a result, these worksurfaces may feature knots, natural colour changes, and minor drying cracks, which are typical characteristics of the product.
